

Build your sprinkler in **2 STEPS**

1 Choose a Head

Metal 3 Arm Head

For low water pressure and even coverage in small to medium gardens.

Plastic 3 Arm Head

Even and thorough coverage in Small to Medium gardens.

Metal Impact Head

For large gardens where coverage is important. Higher water pressure may be required.

Plastic Impact Head

For large garden areas where coverage is important. Higher water pressure may be required.

RotoFrame Head

Large droplets make this useful in windy locations. Can be used in small to medium gardens and runs from low water pressure.

Bobbler Head

Useful with low water pressure in medium to large gardens. Low water usage makes joining multiple sprinklers easier.

Squarewave Head

Great for modern gardens with square designed lawn areas.

Raintech Head

Customisable width and length to suit most garden size requirements.

2 Choose a Base

Metal Base

Solid metal base for users who don't move their sprinkler often or have pets that like to chew on things. Preferred option with impact sprinkler heads.

Plastic Base

Lightweight base with sled design makes it easy to drag through grass and reposition. Better suited to smaller lightweight heads.
