

Natural BLAST®

TREAT PONDS *Naturally*

ATTRIBUTES

- All natural, safe, and biodegradable
- Improves water clarity
- Easy to use, no mixing required
- Targets suspended and floating organic matter
- Reduces sludge layer
- Replaces chemicals and copper

WHEN TO USE

- To control organic matter
- To manage temperature spikes
- New pond with unknown history
- To clean up sludge layer
- Initial treatment of the season
- High amounts of organic matter found
- After large rain event
- Along with AquaSphere®PRO

DIRECTIONS

1 | CALCULATE VOLUME

LENGTH (M)

x

WIDTH (M)

x

DEPTH (M)

x

1000

 TOTAL LITRES

2 | SELECT DOSAGE

Natural BLAST® is available in three sizes

- 4-count box
- 12-count box

Add one Natural BLAST packet
for every 450,000 litres of water

Always treat to the correct volume

*Example: a 1,800,000 litres pond
requires four Natural BLAST packets*

**Natural BLAST can be applied
every 7-10 days**

3 | TREAT

**Begin treatment as soon as water
temperature reaches 7°C**

**Repeat every 7-10 days until desired
clarity is achieved**

Evenly distribute packets

**Overtreatment is safe, and at times,
recommended**

3-STEPS TO A CLEAN, CLEAR AND HEALTHY POND. *Naturally*

STEP

1 DISPENSERS

Dispensers provide a 30-day time release of beneficial bacteria and enzymes that consume excess nutrients in the water to keep it clean and clear of green organic growth and to improve water quality and clarity. Dispensers are all natural, veterinarian approved, and safe for animals and people.

AquaSphere® PRO

- All natural and biodegradable
- Reduces the sludge layer on the pond bottom
- Reduces odor

STEP

2 SUPPLEMENTS

Supplements increase the beneficial bacteria count in the pond, combating excess nutrients and improving water clarity. Our supplements are all natural, safe, biodegradable, and easy to use.

Natural BLAST®

- Advances decomposition
- Treats the entire water column
- One water-soluble bag treats up to 450,000 litres

RUSH®

- Accelerates decomposition of floating organic matter
- Ideal for heavy matting and green slime on rocks

STEP

3 COLORANTS

Colorants reduce the ultraviolet rays that penetrate clear water, keeping the water temperature cooler and discouraging the growth of weeds and green organic matter.

- Use once water shows improvement from dispensers and supplements
- Keeps the pond cleaner
- Still allows for enjoyment of clean water

HOW TO USE

Months 1 and 2 use **STEP 1** and **STEP 2**

Months 3 and ongoing use **STEP 1** and **STEP 3**

Keep the supplements on hand in case of a large rainfall that washes excess nutrients into the pond or when a temperature spike is forecasted.
